ABOUT ME

I am a passionate and dedicated Web Developer with a strong foundation in front-end technologies, including HTML, CSS, JavaScript, and React. Currently pursuing a Bachelor's degree in Computer Science in information Technology (Csit) , I have honed my skills through personal projects and continuous learning.

EDUCATION

DAV COLLEGE
+2 in Science

SAMRIDDHI COLLEGE
BscCsit

SKILL

- Html
- React
- Css
- Tailwindcss
- Js
- UI/UX Design

PROJECTS

NewsApi

For this project, I developed a dynamic web application that fetches real-time news articles from various sources using the News API. The application allows users to search for specific topics and view the latest news, including headlines, images, and article summaries.

Calculator

I developed a simple yet functional calculator application using React.js, focusing on creating a responsive and user-friendly interface. This project allowed me to enhance my understanding of React components, state management, and event handling.

Dictionary app

I developed a dynamic Dictionary application using React.js that fetches word definitions from an external API to provide users with meanings and other linguistic details. The project was a great opportunity to work with real-time data fetching and to enhance the user interface for a smooth and responsive experience.

Many more projects are there which i have done you can visit my portfolio to see them
